

Sky has issued at least two completely different firmware releases on the standard Sky remote control. The codes for each remote are different, and are defined as “Early Version” and “Newer Version” – The codes below are separated accordingly.

### Codes used in EARLY Digibox remotes

|             |        |  |
|-------------|--------|--|
| Acura       | 0891   | 009  |
| Admiral     | 0182   | 115,191,241  |
| Adyson      | 0035   | 245  |
| AGB         | 0010   | 544  |
| Aiko        | 0038   | 297  |
| Aiwa        | (0)023 | - VX range televideo combis, available in all Sky remotes to date.<br><br>The 0 in brackets in each case may not be necessary with each R/C. Older Sky R/Cs use three digit codes and the newer ones use four digit codes.   |
| Aiwa        | (0)729 | - "1st generation" Aiwa TVs, including the TV-SE144 and TV-SE211. Currently only available in the Sky remote control plus, recently launched in the UK.  |
| Aiwa        | (0)733 | - "2nd generation" Aiwa TVs, including the TV-SE1430 and TV-SE2130.<br><br>This has been added to the software currently nearing the end of development, and will be available from the next update onwards. The exact release date is still to be decided by Sky, but is expected to be around six months time.<br><br>If these codes do not work with your specific remote and TV/Televideo, then it could be incompatible. If this is the case, we could only recommend you contact Sky to ask about the possibility of getting your current remote replaced when the new, compatible remotes are issued or, alternatively, continue to use the original Aiwa remote for the operation of the unit. |
